OperaLucis e OperaAuris di Venistile sono costituite da formelle in vetro di Murano e oro a 24 carati in foglia. La preziosità è data dai materiali esclusivi e dalla lavorazione artigianale di ogni pezzo che conferisce un valore unico e artistico alla realizzazione compiuta.

OperaLucis integra la tecnologia della luce a led che permette di evidenziare splendidamente l'effetto caratteristico del vetro di Murano e la luminosità dell'oro.

OperaAuris disegna trame luminescenti d'oro che vibrano con l'illuminazione studiata appositamente.

I materiali pregiati e le lavorazioni artigianali sono legati a Venezia e al TeamV nel quale persone con differenti competenze, capacità e professionalità, vengono riunite intorno al progetto esclusivo delle Opere, concepito e condotto dal brand Venistile che ne garantisce la qualità e l'esclusività.

Le Opere Venistile possiedono una valenza materica percepibile al tatto e all'osservazione ravvicinata, emergono le particolarità dei materiali e della lavorazione.

Il design specifico, la geometria semplice e raffinata del disegno, permettono una vasta gamma di composizioni sulla superficie e rendono la realizzazione pienamente adattabile alla situazione specifica di installazione, assecondando le necessità formali del progetto complessivo.

L'effetto scenico delle installazioni permette di inserire le Opere Venistile in ambienti di alto livello, con soluzioni formali di notevole ricchezza e di efficacia spaziale.

OperaLucis e OperaAuris sono realizzazioni Venistile interamente Made in Italy.

Designer: Altiero Desio
